- 4) Select "Setup My Connection Manually" and click next.
- 5) Select "Connect Using a Dial Up Modem" and click next.
- 6) Select "LGE CDMA Modem" and click Next
- 7) Choose a name for your connection and click next.

Verizon High Speed (230kbps)

- PhoneNumber = #777
- Username = "your phone number"@vzw3g.com
- Password = vzw

Verizon Low Speed

- Phone number: #777
- User: **WEB**
- Password: **WEB**

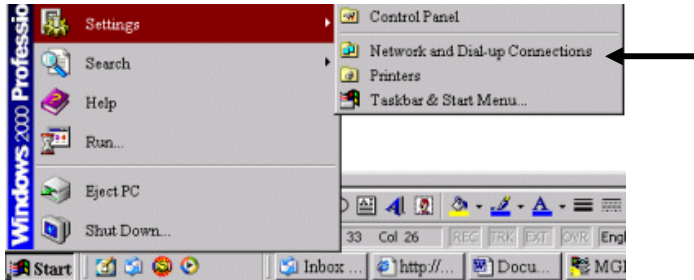

Please note: The above parameters are for Verizon. You may need to consult your carrier for their specific parameters.

Congratulations! You are done.

Windows 2000 – Instructions

NEXT STEP

Go to  scroll to “Settings” and then to “Network and Dial-up Connection”

Make New
Connection

: Make a new connection by double clicking the icon.

- You should see a “Connection Wizard”
- Choose “**Dial-up to the Internet**”
- Choose “**I want to set up my internet connection manually**”
- Next screen choose “**I connect through a phone line and a modem**”
- It will then ask you to “**Select a modem to use to connect to the Internet**” Scroll down the window and choose “**Samsung CDMA Modem**”
- Put **#777** for the phone number as shown below and click “Next”

A screenshot of the 'Internet Connection Wizard' window, titled 'Step 1 of 3: Internet account connection information'. The window contains the following fields and options:

- Text prompt: 'Type the phone number you dial to connect to your ISP.'
- Area code: A text box containing '1'.
- Telephone number: A text box containing '#777'.
- Country/region name and code: A dropdown menu showing 'United States of America (1)'.
- Check box: 'Use area code and dialing rules' is checked.
- Advanced settings: A button labeled 'Advanced...'.

- User Name will be : **WEB**
- Password will be : **WEB**
- It will then ask for a connection name: **You choose any name you want.**
- Set up your Internet Mail account: **“NO”**
- **You should be finished**

The next time you go into your **“Network and Dial up Connection”** You should see the connection name you chose. Click on it and you should see the following:

Click on Dial and you should be connecting to the Internet.

NOTE: Make sure your phone is on the Vision Plan. Vision plan phones only can dial-up to the Internet at high speeds.

NOTE: If you have software already from DataPilot, FutureDial, or Sprint you most likely already have the drive set up.

TROUBLESHOOTING

If your computer does not recognize your phone there are two possibilities.

- You must be signed up on the vision plan. Re-check the "My Plan" on Sprints website. www.sprintpcs.com
- Possibly the chip in the phone needs to reset. Keep the phone and cables connected to you PC and phone. Turn off the phone. Wait about 5 seconds. Then turn the phone on. The chip in the phone should be active now.

To check and see do the following:

- Go to your " My Computer".
- Right click and choose "Properties"
- Go to the 'Hardware" tab
- Select "Device Manager"
- Under Modems it should indicate " LGE CDMA Technologies"
